a09c17d780

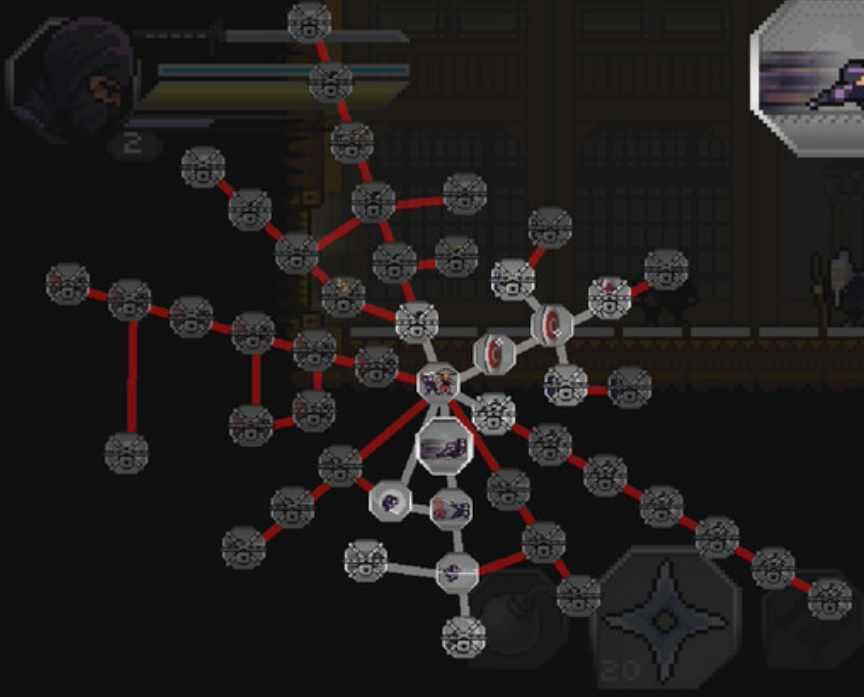

Minimum:

Additional Notes: MP3 Format

English

EXPERIENCE POINTS: 4

DASH

SHARP JERK FORWARD.
DOUBLE-TAP FORWARD

ALPHA

fun game love the idea of it literally will play any background sound you have going it can be pretty funny also its very relaxing. Ok, so I tried 3 times to play this, and failed because im a giant wimp! This is a very well made atmospheric game well worth the cost of the purchase. I would recommend this to anyone that is a fan of the slendy games. But word of warning you have to be very very brave.

If you want to see me spoil my poants trying to play this game you can do [>>HERE<<](#). The main game is good hence a recommendation. But could do a lot more in terms of options and the 3d engine is sluggish for what it is. A somewhat spartan graphics engine should be hitting a consistent 60fps on my spec yet it often drops below that. Even on lowered settings. C'mon devs, it's only a relatively small board with not a lot of pieces.

Also, if you play with gamepad what's with the weird upside down pyramid you have to use to select pieces, that only works if you click on top right corner of a square? It's awkward and makes moving to the wrong square happen rather often. And there is no undo move (which would have been useful for beginners as well). Simply chess merely used a dot for selecting pieces and you didn't have to position it to the top right part of a square to select a piece.

Keyboard and mouse controls are better but why not the option to just use the mouse without keyboard? Rotate piece left could be mouse wheel down. Rotate right could be mouse wheel up. But i have to keep reaching out for the shift keys.

Good but could be better. It's never too late to add a bit more polish.. This is the exact opposite of what the description entails. If anything, there are even less features in this game than there were in it's first title. Low numbers of players even at launch meant I spent 30 minutes of my play time simply finding a lobby to join in that I wasn't spontaneously kicked out of, so before I reach the 2 hour mark, I just want to get the refund now. A complete waste of time.

There is even only ONE audio option in game, which is master volume, so you have to deal with the most obnoxious commentator the whole time you're playing, followed by the loudest guns I have heard. This is literally a H1Z1 alpha, it's embarrassing, you can't even drive vehicles.

I only played one game, so take that as you will, but when there's titles like PUBG and Fortnite already out there, there's absolutely 0 point in buying this monstrosity. This is an obvious cash grab from the publishers milking out an already dehydrated cow.

Oh also, they have lootcrates.. I would've liked it if the characters were more fleshed out and the story was longer but...

oh whatever. It was cheap. cool graphics, very creative envrionment

confusing and frustrating gameplay

wouldnt recommend as it is right now. I played this game from start to finish. It was the most boring experience of my life. The story was un compelling and poorly written and not immersive in any way. As such, I will be listing things you can do that would be more entertaining and less painful than playing this game.

- Licking a wasp nest
- Filling sandbags
- Watching water boil
- Attending council meetings
- Walking a legless dog
- Daydreaming about nothing
- Eating people's scabs
- Shaving your cat
- Slicing bread
- Watching Idol or The Voice and pretending the singers are superheroes
- Touching battery acid
- Smelling other people's socks

If you find yourself in a life-or-death situation in which you must choose between playing this game or watching Oprah... god

help you.. Is this a joke?

Steam badly needs quality control.. Big Improvement over the original bridge constructor wich was already a fun game.. adding the sun driving to the new version just made it Epic... very fun for a cheap game from a bundle please keep up the great work Developers.. This game is pretty broken.

The movement feels weird, the hitboxes seem inaccurate, the graphics are meh, sometimes when you try to jump it doesn't recognize it and you will just fall. This makes the game pretty diffucult and really frustrating.

But the worst thing of all is: you will get addicted. **YOU CAN'T STOP PLAYING ANYMORE.** you need to get to the next checkpoint and even your girlfriend in underwear won't stop you from reaching your goal.

This is why i will give this a positive rating without a doubt. I recommened this game!

Amazing adventure game.. The Martian Knot made me feel like a kid again. it is very cool game i happy. Amazing idea . So happy PSH can live on through attom universe . Even happier that its available on pc. as i didnt want to buy a ps4 just for this game. It's one massive let down though is that it constantly crashes . i mean 58 crashes in less that 30 mins game time? 0.0 and random server disconnects. such a shame.. Someone actually put their name to this garbage. Wow.. This game is broken with broken mechanics and bad coding, which the developer masks as a hardcore game.

The graphics isn't that bad and that's it, the music is bad, the game itself is bad.
Unfortunately there isn't more to say, a game that has broken coding tells you all you need to know about staying away from it.

Note if you buy the game you are ether a game collector or a achievement collector, if you are a achievement collector be prepared to face you frustrations like never before for this one. The terrible coding does make it really hard to get them all.. I was feeling nostalgic when I got this and I dont regret it all.

Graphics are of course dated from a game released in 1995.

Choose your ... vehicle ? and race, its that simple.

Each racer has their strengths and weaknesses from being fast but not agile or just being able to hits walls at speed with more frequency there is something for every race style.

As always highly recommends this old gem when its on sale.. Has potentials, but the developer of this game has no concept of async-loading.

This game keeps loading resources a lot after you play long, and every time it loads something(like to open a menu, play some balloon effect) it gets stuck for a 1 or 2 seconds. The memory it takes piles up too and may have leaks.

I need to restart computer now.

FFS, the UI needs optimazing!!!!!! This game takes way too long to finish for a match 3 game.

Gist of the game:

You play a match 3 to fill up your monster's attack bar, then you match the glowing gem to attack the enemy monster. A match game can end very quickly.

The problem: monsters have levels, you will hit the level cap and will be unable to keep your monster to fight in the next level. You will also have to level up pretty high to beat some of the "farm/grind" monsters. Speaking of which, they respawn every time you leave the map. You are forced to leave the map after each boss fight, so when you re-enter the same world, you have to fight all the low level monsters all over again, which takes a lot of time.

To fully explore each world, you would probably spend many many hours because of the interruptions from the low level monsters, thus it just becomes a boring grind.. My wife and I play it together and i can honestly say 10V10. it is far less stressful than overcooked, but still very fun. there is a lot of content in this game and i cant wait to play it more!
